

The Art of Diaper Folding

(It's easier than you think)

1. The **Tri-fold** – Fast and easy – no pins or fasteners required!

				
Lay diaper flat lengthways	Fold bottom of diaper in 3-4 inches (depending on desired length)	Fold right side in by one-third	Fold left side in so diaper is now folded in thirds	Place folded diaper inside cover and baby inside diaper!

2. The **Fan Fold** -- a great, snug fit for babies on the move. Use with Snappi® Fastener.

				
Lay diaper flat lengthways	Fold bottom of diaper in 3-4 inches (depending on desired length)	Fold right side in by one-third	Fold left side in so diaper is now folded in thirds	Unfold (fan) top corners – creating a natural spot for a baby bum!

3. The **Twist!** – great for babies with chunky thighs. Use with a Snappi®, or just place in a Velcro cover.

		
Lay diaper flat lengthways	Reverse the two corners closest to you to create a twist in the middle	Place folded diaper inside cover and Velcro around baby

4. Night time Diapering

Yes, you can have a baby in cloth diapers who sleeps through the night with no leaks!

Double diapering works best and can be done with any folding technique. Use the folding method in #2 to fold the second diaper into quarters. Just lay this diaper along the centre of your preferred folding style.

Snappi® Use

Snappi®s WORK BEST with terry cloth diapers, cotton prefolds (Chinese or DSQ), and other cloth diapers with a loose enough weave for the Snappi® to hook into. They DO NOT work well with tightly woven diapers.

WARNING:

ALWAYS use a cover when using a Snappi® fastener with your baby's diaper.

Keep out of children's reach when not in use!

Do NOT use a Snappi® fastener on toddlers that have the ability to undo their cover and take off their diaper and/or clothes.

Do not use your Snappi® for longer than 6 months.

Do not leave your Snappi® lying in the sun as it is not UV resistant and can reduce the effectiveness of the Snappi®.

CARE: Clean your Snappi® in hot soapy water. Do not launder them with diapers in the washer as this may weaken the grip attachment.

CAUTION:

- Any tear in the Snappi® can lead to separation of a piece, presenting a **possible choking hazard**.
- Do not cut your Snappi® as this could create weak spots in your Snappi®.
- Do not pull on the side strips of the Snappi® when attaching it, as this can cause them to break. These strips serve as a safety feature only, as explained above. Use the flat tabs for leverage. Inspect your Snappi® before each use and discontinue use immediately if there is any sign of cracking, tearing, breakage or wear of the teeth or any other parts.
